

## IN THE CLAIMS

Please amend the status of the claims to that indicated by the following:

Claims 1-11 (canceled)

12. (new) A re-sealable pocket, comprising:

a first panel;

a second panel connected to said first panel along a pair of sides and a bottom edge, said first panel and said second panel being opposed to one another; and,

means for closing said re-sealable pocket provided along a top edge of said re-sealable pocket, so that said top edge is openable and closable.

13. (new) The re-sealable pocket according to Claim 12, wherein said means for closing is a press-lock mechanism having a male track and a female track for inter-engaging one another for providing a seal when said male track and female track are pressed together, wherein said press-lock mechanism is re-sealable.

14. (new) The re-sealable pocket according to Claim 12, further comprising a gusset located along said bottom edge.

15. (new) The re-sealable pocket according to Claim 14, wherein said gusset includes at least one fold for providing separating portions for contents retained by said re-sealable pocket.

16. (new) The re-sealable pocket according to Claim 14, wherein said gusset is constructed as a divider for permanently separately contents located in said re-sealable pocket.

17. (new) The re-sealable pocket according to Claim 12, wherein said first panel includes a slot located thereon.

18. (new) The re-sealable pocket according to Claim 12, wherein said re-sealable pocket is made of a transparent material, so that contents retained by said re-sealable pocket are visible to a user.
